

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Blackfriars Oriental Focus Fund (the "Fund")

A sub-fund of Blackfriars Developing Markets Funds plc (the "Company") IE00B02H5702 – Class GBP A

Objectives and Investment Policy

Objective: The investment objective of the Fund is to achieve long term capital growth through investment in global equity markets.

Investment Policy: The Fund invests mainly in equities and equity-related securities (such as convertible bonds and warrants). The Fund can also hold some cash. In normal circumstances growth companies from Asian markets excluding Japan will comprise the substantial majority of investments held by the Fund.

Investment Process: The investment manager employs bottom-up company specific analysis to identify growth companies around the world. By undertaking extensive, disciplined internal research and by utilising external contacts and networks the investment manager is well positioned to identify investment opportunities for the Fund. Although the investment manager will seek to be pragmatic in the use of the most appropriate investment style for the prevailing market conditions, over the long term it is believed that investment in shares of companies offering the prospect of high growth will generate superior investment returns. The investment manager will seek to identify companies that will benefit either from exposure to favourable macroeconomic

conditions or from a competitive advantage borne out of proprietary technology or superior management strategy.

Derivatives: The Fund may use derivatives to reduce risks, or as an alternative to direct investment in a security.

For more about the investment objective and policies see the Supplement for the Fund available at www.blackfriarsam.com.

Dividends: Dividends may be paid and if paid, such dividends will be applied in the purchase of further Shares (unless a Shareholder elects to receive cash).

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within five years. This Fund is for investors who are willing to accept the risks and volatility associated with investing in primarily Asian stock markets.

You can place orders to buy or sell Fund shares on each Business Day. A Business Day is a day on which banks are open for business in Dublin or such other day as the Directors may, with the approval of the Custodian, determine.

Risk and Reward Profile

The indicator above is not a measure of the risk of capital loss but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The Fund is classified in the category indicated above due to its past behaviour over the past five years.
- The value of an investment in the Fund can go up and down. When you sell your shares, they may be worth less than you paid for them.
- The risk/reward rating above is an estimate; it is not guaranteed to remain unchanged. The risk category may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its commitments to the Fund.

Derivatives risk: Certain derivatives could increase Fund volatility or expose the Fund to losses greater than the cost of the derivative.

Liquidity risk: Certain securities could become hard to value, or to sell at a desired time and price.

Emerging markets securities risk: The Fund may invest in securities of issuers located in emerging market countries which may or may not be members of the OECD. Investments in emerging market securities pose additional risks including increased political and economic volatility, taxation risks, legal risks, inflation, exchange control and restrictions regarding foreign investment.

Unpredicted significant events: The rating does not reflect the possible effects of unusual market conditions or unpredicted significant events (such as natural catastrophes or "acts of god").
