

## Investment Objective

The Blackfriars Oriental Focus Fund invests in Asian equity markets excluding Japan and aims to generate long term capital growth. The Fund is not managed against, nor constrained by, any index. The mandate is "long only" and the portfolio is subject to normal market risk. The Euro A share class is unhedged.

## Commentary

Asian equities slipped in November with the MSCI AC Asia ex Japan Index falling 1.4%. Singapore (+1.8%) and Thailand (-0.3%) outperformed while India (-2.7%) slipped. By sector, Consumer Staples (+0.4%) and Consumer Discretionary (-0.2%) held up well while Energy (-3.0%) gave up some ground.

The star performer for the portfolio last month was Silver Heritage (+20.3%). Silver Heritage has not covered itself in glory since our purchase last summer but, after cost overruns and various other delays, the 100 room five-star Tiger Palace Resort Bhairahawa is finally open for business. The casino should receive its operating licence shortly. The Tiger Resort will be the third casino managed by the group and will almost triple the number of gaming tables. While the existing two casinos have generated modest cashflow in recent years, the Tiger Resort is an absolute game changer for Silver Heritage's revenue and earnings profile.

Vietnamese property company, Nam Long Investment (+7.7%), rose ahead of a proposed one for five rights issue. Recent purchases JNBY (+4.8%), a China based designer clothes retailer, and Hanssem (+8.5%) also had a good month while Siam City Cement (+4.8%) recovered from recent weakness. Tencent (+11.3%) continued its vertical ascent while TSMC (-8.6%) and Samsung Electronics (-7.0%) consolidated recent gains.
