

## Investment Objective

The Blackfriars Oriental Focus Fund invests in Asian equity markets excluding Japan and aims to generate long term capital growth. The Fund is not managed against, nor constrained by, any index. The mandate is "long only" and the portfolio is subject to normal market risk. The Euro B share class is unhedged.

## Commentary

Asian equities were swept higher in January building on the gains of last year. China (+8.9%) and Thailand (+5.1%) outperformed while the Philippines, India and Korea lagged.

Recent purchase Finetex, a Korean manufacturer of nano-fibres, gained 40.6% in January while another relatively recent purchase, JNBY (a Chinese designer clothes retailer) gained 21.4%. Sun Art Retail rose 24.4% while mid double digit returns from other old favourites such as HDFC, Sands China and Land & Houses also helped. Less helpful was the 14.4% fall in our favourite Nepalese casino. The company announced strong 4Q17 revenues at month end and, with the Tiger Palace Resort finally up and running, we remain extremely bullish on the company's prospects. We opened a position in Larsen & Toubro which is benefitting from the acceleration in India's infrastructure spending. We also opened a position in Sunny Optical taking advantage of the recent one third decline in the share price.

The recent weakness in the US bond market following some very strong economic data releases is a little unnerving but we remain fairly comfortable with the valuations around the Asian region where the economic outlook remains excellent.
