Investment Objective

The Blackfriars Oriental Focus Fund invests in Asian equity markets excluding Japan and aims to generate long term capital growth. The Fund is not managed against, nor constrained by, any index. The mandate is "long only" and the portfolio is subject to normal market risk. The Sterling B share class is unhedged.

Commentary

Asian equities continued their surge in July with the MSCI AC Asia ex Japan Index gaining 3.9%. China (+6.4%) and India (+5.1%) led the region higher while Korea (+1.4%) added to earlier gains. ASEAN and Asia's frontier markets continue to underperform by a significant margin. By sector, Information Technology (+5.2%) continues to run hard as do Financials (+4.4%), while Consumer Staples (-3.8%) continue to lag. These relative country and sector movements were unhelpful to the portfolio which remains heavily invested in both ASEAN and consumer stocks.

Portfolio holding ITC (-12.5%) gave back recent gains after the Indian government increased the cess (excise tax) on cigarettes. Astra International (-14.2%) retreated after posting indifferent first half earnings and amid fears of rival product launches in the second half. Solid results from HDFC (+11.0%), Zee Entertainment (+10.0%) and Shinhan Financial (+8.4%) were duly rewarded by investors and, needless to say, the portfolio enjoyed strong gains from portfolio holdings Alibaba, Tencent and ICBC.

The improved performance of the Chinese economy and steady growth in most other regional economies remain helpful factors, although the increasingly narrow nature of the regional equity advance (it is being driven almost entirely by e-commence and Chinese financials) is of some concern.
