What is this product?

Type: The product was incorporated in England and is an investment company listed on the London Stock Exchange (“LSE”). There is no maturity date.

Shares of the product can be traded on the LSE. Typically, at any given time on any given day, the price you pay for a share will be higher than the price at which you could sell it and brokers may additionally charge commission.

The product may borrow to purchase assets for the company, which can magnify any gains or losses made by the company. At present the product is not geared and does not have any borrowing facilities.

Objectives: The investment objective of the Company is to achieve long term capital growth from a managed international portfolio of securities. The preservation of capital is of primary importance to the investment objective. The Company aims to achieve absolute returns and is not managed by reference to any equity or bond index or benchmark. The Company’s Investment Policy is to invest primarily in equities issued by companies listed on regulated markets and with the prior approval of the Board, the Company may invest in unlisted securities. Up to 30% of net assets may be invested in investment products managed by the Company’s Investment Manager and the Company may also hold positions in investment products managed by third parties, with a maximum of 15% of net assets (at cost at the date of investment) invested in any one security. The Company may borrow up to a maximum of 50% of net assets.

Intended retail investor: This product is intended for institutional investors and professionally-advised private investors seeking exposure to the equities of listed or quoted companies. The product may also be suitable for investors who are financially sophisticated, non-advised private investors who are capable of evaluating the risks and merits of such an investment and who have sufficient resources to bear any loss which may result from such an investment. Such investors may wish to consult an independent financial adviser who specialises in advising on the acquisition of shares and other securities before investing in the shares. The product is suitable for investors who want to invest for at least 5 years and are seeking capital growth and potential dividend returns. The continuation of the Company is subject to approval by shareholders every 3 years, with the next continuation vote due to be put forward at the AGM to be held in 2019.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk

Higher Risk

The summary risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

The Risk Indicator rates the potential losses from future performance at a medium level, and poor market conditions could impact your ability to realise your position.

This product does not include any protection from future market performance, so risk can vary significantly due to potential short term market availability. As a result, realisations in such market conditions will significantly impact

Counterparty Risk: The product bears the risk of settlement default by clearing houses and exchanges and the risk of delayed repossession or disputed title of its assets in the event of failure of the custodian. Additionally the risk of capital losses from operational and regulatory risk resulting from human error, system failures or incorrect valuations of the underlying securities.

Geographic and sector concentration Risk: The product diversifies its investments by sector and geography however a significant impact on a particular sector or geography could materially impact capital value.

Emerging market risk: The product may invest in securities of companies in emerging markets. Such securities may involve a higher degree of risk and may be considered speculative.

Currency Risk: Movements between the currency of underlying assets and the currency in which the product prices may impact the final return you will get. This risk is not considered in the indicator shown above.

Market Risk: The product’s investments are subject to normal

on how much you get back.

Investment Risk: There is no guarantee that the product will achieve its objective. A fall in equity prices and adverse movements in foreign currency exchange rates can have significant impact on capital values.

market fluctuations and the risks inherent in the purchase, holding or selling of equity securities.

Liquidity Risk: As shares trade via the secondary market, trading volumes may reduce, or shares may trade at a discount to their respective Net Asset Value, as a result of a variety of factors, such as market conditions, liquidity concerns or company performance. As a result Shareholders may be unable to realise their investment at quoted market prices.

Performance Scenarios

Investment £10,000

		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	£4,893	£5,620	£4,665
	Average return each year	-51.07%	-17.48%	-14.15%
Unfavourable scenario	What you might get back after costs	£8,981	£8,810	£8,955
	Average return each year	-10.19%	-4.13%	-2.18%
Moderate scenario	What you might get back after costs	£10,486	£11,529	£12,672
	Average return each year	4.86%	4.86%	4.85%
Favourable scenario	What you might get back after costs	£12,238	£15,081	£17,922
	Average return each year	22.38%	14.68%	12.38%

The table shows the money you could get back over the next 5 years under different scenarios, assuming that you invest £10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you may get will vary depending on how the market performs and how long you keep the investment.

The figures shown include all the costs of the product itself and do not include any costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect the amount you get back.

What happens if The Establishment Investment Trust plc is unable to pay out?

The value of the shares in the product is directly impacted by the solvency status of The Establishment Investment Trust plc. There are no investor compensation or guarantee schemes available to investors should The Establishment Investment Trust plc be unable to pay out.

What are the costs?

Costs over time	The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs (where applicable).			
	The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume that you invest GBP 10,000. The figures are estimates and may change in the future.			
	The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment overtime.			
	Investment £10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the recommended holding period of 5 years
Total Costs	£189	£583	£1,003	
Impact on return (RIY) per year	1.89%	1.80%	1.77%	

Composition of Costs	The table below shows:			
	<ul style="list-style-type: none"> The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period. What the different cost categories mean.
